

Small Layouts Volume 2 STILL IN PRINT!

The evergreen second volume digitally reprinted

First printed in 2000 this second volume in the Small Layouts series has been one of our most popular publications to date. When the initial print run was exhausted it was given a spruced-up new cover and reprinted in 2008.

Demand was such that a third run was needed in 2019 and a limited run of high definition digital copies were produced from the 2008 masters – with the same laminated covers and on top quality paper. The layouts and plans are as relevant and fresh today as they were twenty years ago when the book was first compiled by the late Roy Jackson.

**72 pages black with
spot colour and 8 page
colour section. 55
layouts with photos
with track plans**
